

# Earth Science... Not Just Rocks!

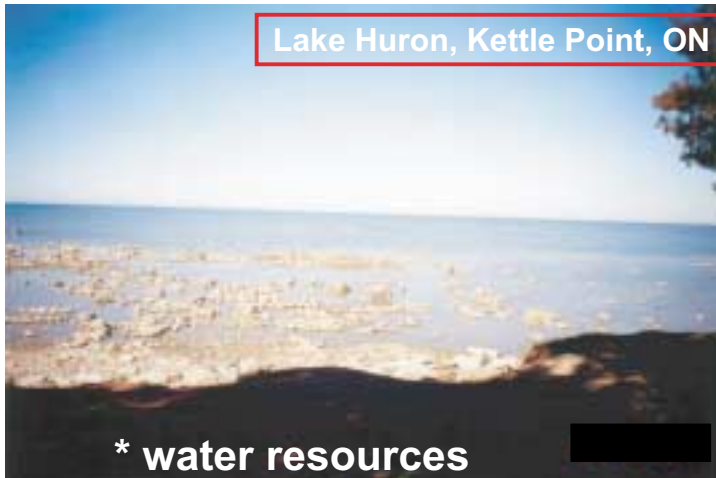

## WANT TO LEARN ABOUT PLANET EARTH?

Then take an **Earth Science** course!

Learn about:

- Minerals, rocks, and fossils
- Human impacts on the environment
- Water resources and quality
- The landforms around you
- Daily weather patterns
- GIS, GPS, and other geospatial technology

The following courses for **WINTER 2003** DO NOT require prerequisites, and are great for filling timetables:

- \* 03-200 Science, Technology and Society
- \* 61-111 Our Changing Earth
- \* 61-141 Earth Systems II: The Earth's Surface
- \* 61-210 Introduction to Oceanography
- \* 61-213 Geology and the Environment
- \* 67-100 Introduction to Geomorphology
- \* 67-102 Atmosphere and Climate
- \* 67-210 Principles and Applications of GIS
