Mini Baja is an international event sponsored by the Society of Automotive Engineers. Every year a group of talented and enthusiastic young engineers represent the University of Windsor at this worldwide event. The team's main goal is to design and build a small off road recreational car that will compete with the best Universities from around the world.

Through this event, students will be able to strengthen skills to become better engineers to serve industry and economy. All proceeds will be used to assist students in participating in this event.

Visit our team website at www.minibaja.uwindsor.ca for a map with directions as well as more team information on the SAE Mini Baja Team. *Thank you for your support.*
