Goals

Calculation of single-logarithmic and nonlogarithmic three-loop radiative-recoil corrections generated by the gauge invariant sets of diagrams with fermion factors with two radiative photons

(D) (0) (2) (2) (2)

Goals

- Calculation of single-logarithmic and nonlogarithmic three-loop radiative-recoil corrections generated by the gauge invariant sets of diagrams with fermion factors with two radiative photons
- Calculation of single-logarithmic and nonlogarithmic three-loop radiative-recoil corrections generated by the gauge invariant set of diagrams with light-by-light insertions in the exchanged photons

Goals

- Calculation of single-logarithmic and nonlogarithmic three-loop radiative-recoil corrections generated by the gauge invariant sets of diagrams with fermion factors with two radiative photons
- Calculation of single-logarithmic and nonlogarithmic three-loop radiative-recoil corrections generated by the gauge invariant set of diagrams with light-by-light insertions in the exchanged photons
- Work on these corrections is in progress now
