

Today's leaders in science – teaching tomorrow's leaders.

Today's University of Windsor is home to world leaders in research and development. Respected academics, such as Dr. Doug Stephan, whose work is paving the way to new molecular materials that are the basis of new space-age technologies, are involved in dozens of projects and programs that

will help shape the world in the years to come. They're also busy shaping the minds of tomorrow's science leaders. The University of Windsor is a busy, exciting, and rewarding place to study science. We invite you to join the quest for knowledge and personal development.
